

Adobe Photoshop Module

Overview of Graphic Design

Understand the fundamentals, tools, and creative techniques that shape modern design.

Introduction to Photoshop Interface and Tools

Explore Photoshop's workspace, menus, panels, and essential tools to get started.

Design Psychology Basics

Learn how colors, shapes, and visuals influence emotions and audience perception.

Principles of Design

Master balance, contrast, alignment, and other key principles for strong compositions.

Concept Development

Discover how to brainstorm, research, and develop creative design ideas effectively.

Exploring Trending Designs

Analyze current design trends and learn how to apply them in your projects.

Demanding Design Skills and Styles

Identify the most in-demand design skills and master popular creative styles.

Typography and Text Effects

Work with fonts, typefaces, and creative text effects for impactful designs.

Shape and Vector Design

Use shapes, paths, and vector tools to create scalable and professional graphics.

Clipping Path

Learn how to cut out objects precisely and create clean, professional compositions.

Photo Manipulation

Combine multiple images and elements to create surreal and artistic visuals.

Photo Retouching

Enhance portraits and images with professional retouching techniques

Masking

Master masking techniques for advanced image blending and editing control.

Menu Bar in Detail (Edit, Filter, Image...)

Get an in-depth understanding of Photoshop's key menus and hidden features.

Social Media Project (05 Classes)

Design engaging posts, stories, and ads tailored for different social media platforms.

Advertisement Design

Create eye-catching ads that effectively communicate messages to the target audience.

Branding and Identity

Learn how to design logos, color palettes, and brand assets that stand out.

Event Poster Design Project

Design impactful event posters that grab attention and convey key information.

Figma Basic Class

Get introduced to Figma for UI/UX design and collaborative creative work.

Design a Personal Portfolio

Build your own design portfolio to showcase your creativity and skills.

Live Project

Apply your knowledge to real-world projects and gain hands-on experience.

Creating an Online Portfolio (Behance)

Publish and showcase your designs on Behance for global exposure.

AI in Design (AI Course)

Discover how artificial intelligence is transforming design and learn essential AI tools.

Adobe Illustrator Module

Getting Started

Class 01: Installing Adobe Illustrator & Document Setup

Class 02: Illustrator Basic Interface & Operating

Class 03: Selection, Scale, Move, Align, Group & Layers

Core Tools Mastery

Class 04: Pathfinder, Shape Builder & Compound Path

Class 05: Workspace Setup, Reflect, Shear Tool, Lock/Unlock, Hide/Show

Class 06: Arrange, Copy/Cut/Paste, Stroke, Fill & Gradient

Class 07: Selection Tools – Magic Wand, Lasso & Smart Selection

Class 08: Pen Tool & Line Tools (All variations)

Class 09: Brush Tools – Paintbrush, Blob Brush, Pencil, Eraser

Class 10: Advanced Stroke & Width Tool

Class 11: Free Transform Tool

Class 12: Live Paint Bucket Tool

Class 13: Perspective Grid Tool

Class 14: Mesh Tool

Class 15: Eyedropper, Measure & Blend Tool

Class 16: Symbol Sprayer Tool & Graph Tools

Class 17: Artboard & Slice Tool

Class 18: Hand, Zoom & Navigation Tools

Menus & Options

Class 19: File Management & Global File Format Standards

Class 20: Edit Menu

Class 21: Object Menu

Class 22: Type Menu

Class 23: Select Menu

Class 24: Effect Menu

Class 25: Appearance Panel

Class 26: View Menu

Class 27: Window Menu (Part 01)

Class 28: Window Menu (Part 02)

Class 29: All Kinds of Masking

Design Foundation & Practice

Class 30: Understanding the Foundation of Color Theory

Class 31: Copy Practice – Visiting Card

Class 32: Copy Practice – Flyer

Class 33: Mockup Presentation A to Z

 **Professional Growth**

Class 34: Design Theory & Idea Development

Class 35: Portfolio Preparation

Class 36: Freelancing Platforms Overview
